EXPERIENCE

TravelPort — Fullstack Software Developer

REMOTE/BARCELONA

JAN 2021 - PRESENT (1 YEAR)

I took the opportunity to work in a multicultural agile team of 10 members around the world, working with Product Owners, Scrum Masters and others developers to maintain and develop functionalities to the TravelPort Cloud Platform.

We used Azure DevOps, GraphQL, Shift-Left, BDD (Gherkin), SAgile, React, Node, Express, Redux, GIT...

WHAT DID I ACHIEVE?

- DEVELOP NEW FUNCTIONALITIES INSIDE A REALLY BIG PROJECT INSIDE THE AGILE AND DEVOPS FRAME
- NEW TECHNOLOGIES LEARNED: GRAPHQL, AZURE DEVOPS, BDD (GHERKIN), AND UNDERSTANDING SAgile

Dalson Trade — Fullstack Software Developer

REMOTE/BARCELONA

FEB 2018 - DEC 2020

I had the chance to take part of the key decisions in a software called Thunderchild: App dedicated to manage the SAP corporate events.

We started from a blank project deciding what technologies we needed: Redux, React, Material-UI, Testing in Backend (Mocha & Chai) and testing in Front (Cypress), practicing peer-programming almost every day.

I worked on my daily basis inside a multicultural and remote team of 6 developers. Using SCRUM methodology we created the perfect frame to learn and deliver the project.

WHAT DID I ACHIEVE?

- BUILD THE FIRST VERSION APP IN 15 MONTHS FROM SCRATCH WITH NO EXPERIENCE
- DESIGN, IMPLEMENT AND IMPROVE THE SCRUM METHODOLOGY
- NEW TECHNOLOGIES LEARNED: REDUX, MATERIAL-UI, CYPRESS TESTING
